CloudEarly DWC LLC

Dear CloudEarly Hiring Team,

I am applying for the Business Development Representative role at CloudEarly. CloudEarly's combination of Salesforce consulting, Agentforce AI, Tableau-led decision intelligence, and cloud integration work appeals to me because my background sits at the intersection of B2B sales development and technical products.

Across Root Network, Mystiq, and Camie Tech, I managed the lead-generation lifecycle from market research through opportunity handover. I researched markets and ideal customer profiles, identified target accounts and decision-makers, sourced prospects through LinkedIn Sales Navigator, lead-generation tools, referrals, and existing databases, and organized activity in Salesforce. I also built and managed Dripify, Pardot, LinkedIn, and email campaigns; made prospecting calls; wrote personalized outreach; maintained follow-up cadences; nurtured and qualified leads; booked meetings; and handed qualified opportunities forward with clear notes.

My approach is research-first. Before launching a campaign, I study the industry, account profile, relevant stakeholders, and likely business problem so the message is focused rather than generic. I then track lead status, activities, follow-up dates, campaign performance, and pipeline hygiene in Salesforce, using the results to improve targeting, messaging, automation, and nurture sequences. I have also supported content, social, webinar, and event promotion.

My software and AI engineering background is an additional advantage for CloudEarly. I can understand AI, SaaS, API, cloud, and data solutions quickly and communicate their value clearly to both business and technical stakeholders. I would bring disciplined prospecting, accurate CRM management, technical curiosity, and a proactive process-improvement mindset to your team.

Thank you for considering my application. I would welcome the opportunity to discuss how I can help CloudEarly build a focused, measurable, and consistently managed sales pipeline.

Sincerely,

Inioluwa Atanda
